

KATANGA'S COPPER AND COBALT PROJECT

Three elements

THE MARKET

- ❖ The copper and cobalt have been called “Heaven commodities”
- ❖ As we begin to rely on alternative ways to provide a cleaner world, copper will hold an important role in the

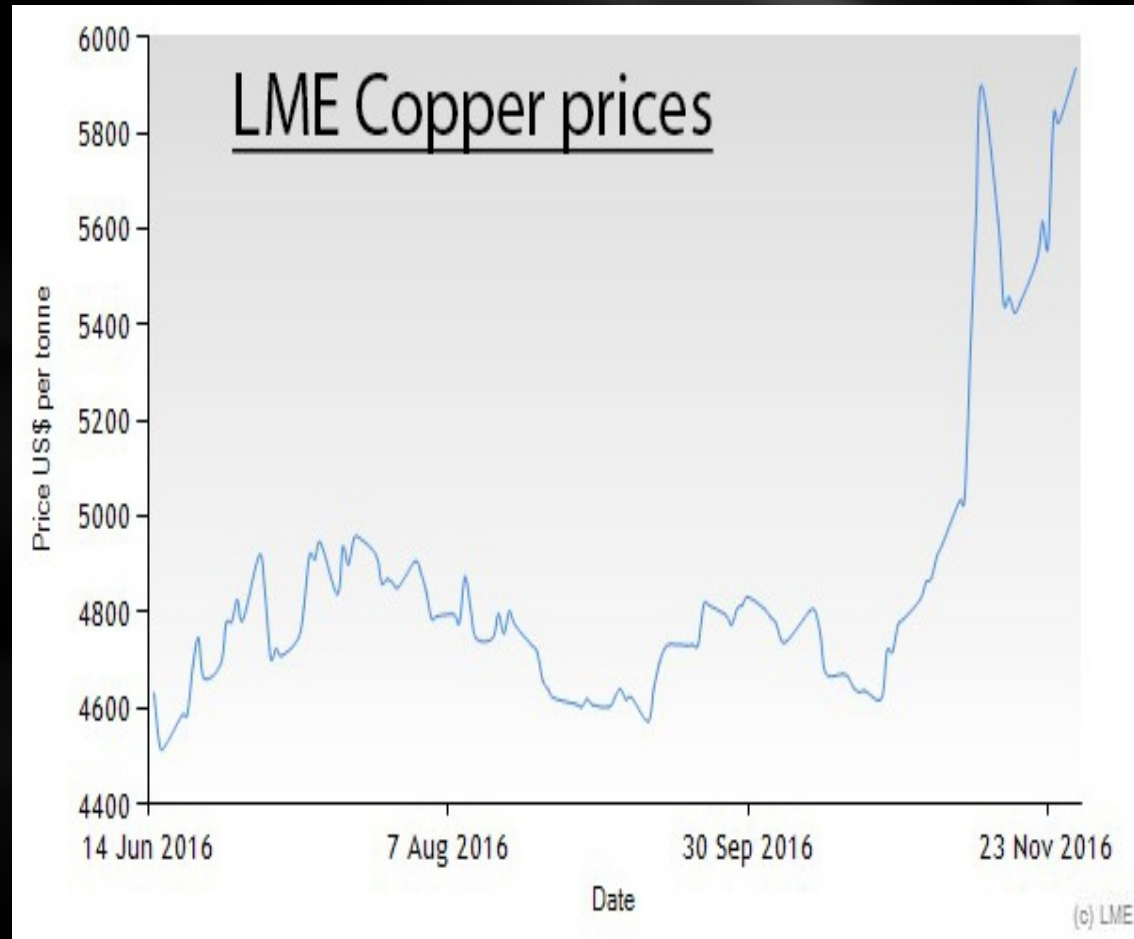

THE MARKET

- ❖ 60 % of global Cobalt production comes from Katanga DRC
- ❖ Recent news about Tesla's (NASDAQ:TSLA) and worldwide demand for lithium ion batteries has driven the price of lithium and companies producing and exploring the resource to new highs

THE MARKET

- ❖ In recent years, the demand of Copper and cobalt has tremendously increased

THE POTENTIAL KATANGA COPPERBELT

The Global market's eye is on the Katanga CopperBelt

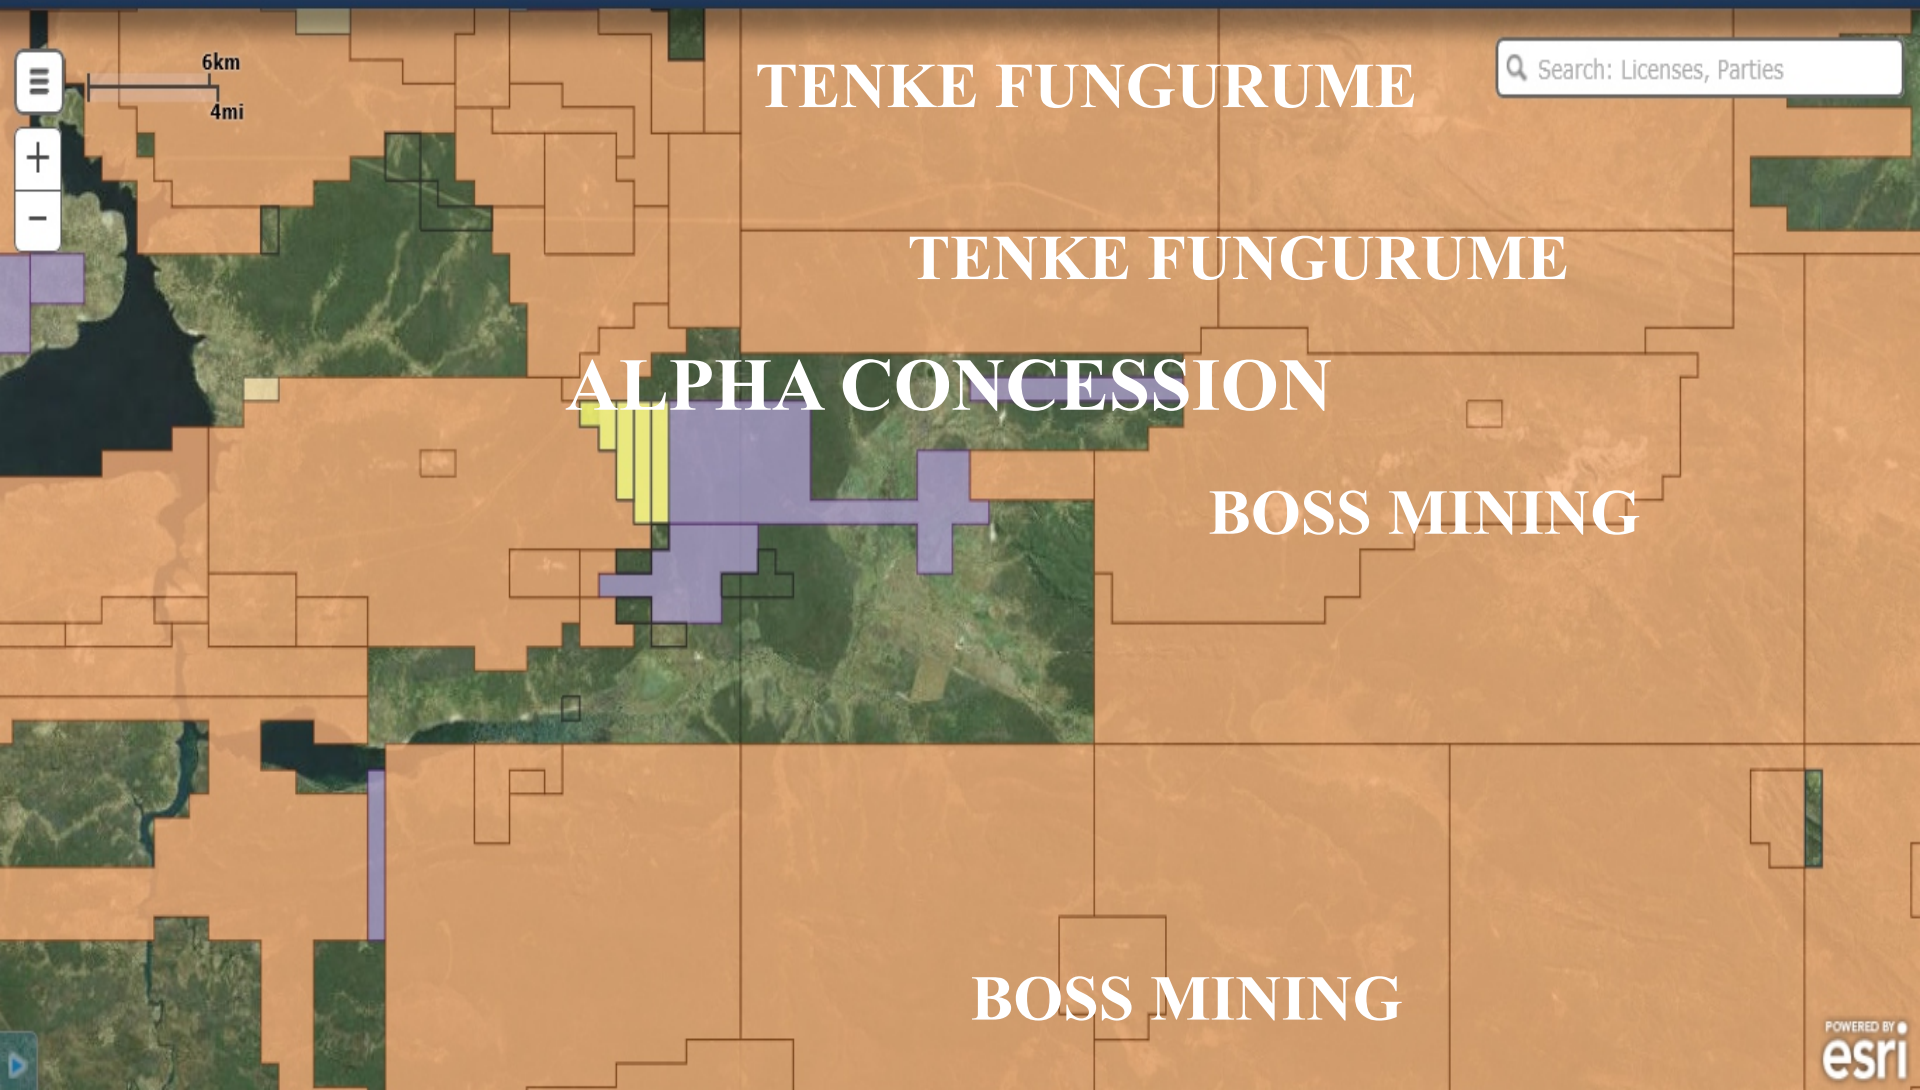

THE POTENTIAL KATANGA COPPERBELT

THE POTENTIAL KATANGA COPPERBELT

- ❖ The Katanga copper belt is in Katanga, Democratic Republic of Congo “DRC” in Central West Africa
- ❖ The Katanga copperbelt includes some of the highest grade copper and cobalt deposits in the world
- ❖ The high cobalt content in surface sediments/soils of the Katanga Copperbelt is a unique feature, unknown elsewhere in the world

THE POTENTIAL ALPHA CONCESSION

THE POTENTIAL ALPHA CONCESSION

- ❖ Alpha concession is located in the Katanga province 165 kilometers from Lubumbashi, in the Democratic Republic of Congo “DRC” in Central West Africa with targeted scope of tens of thousands tons of high-grade copper and Cobalt per annum
- ❖ Alpha Concession sits on More than 1,780 Hectares of high-grade copper and Cobalt ore

THE POTENTIAL ALPHA CONCESSION

- ❖ Alpha Concession is adjacent to Tenke Fungurume mining to the South-West and sits on a straight line between two of the most rich in High-grade copper ore fields in the world: Tenke Fungurume and Boss Mining
- ❖ The estimated reserve for Tenke Fungume is 103 million Metric Tons of Copper and Cobalt ore
- ❖ The estimated reserve for Boss Mining is 3.7 million Metric Tons of Copper and Cobalt ore

THE POTENTIAL ALPHA CONCESSION

- ❖ Based on the occurrence of artisanal workings, neighboring mines and deposits, and the location of the concession within the known extents of the Katanga Belt, Alpha Concession has the potential to host a mineralized deposit similar in nature to Tenke Fungurume and Boss Mining
